formation in plants, optimum conditions for, ...13721
from *Gonocaryum* fruit peels, ...353
ingested, effect on guanase of spleen, ...13741
on vitamin A distribution in organs, rat, ...6949
metabolism, in animals, ...6936
in milk, dependence on feed of cow, ...6939
photochemical reactions of vitamin A and, relative velocities, ..13731
reactions with trichloracetic acid and chloral hydrate, ...15616
relation of astacin to, ...17892
to flavines and vitamins A and B_2, ...6966
requirement of chick, ...15710
separation, of α- and β-, adsorption method, ...6983
method, ...13368
synthesis by bacteria, ...11142
in treatment of ocular affections, 6938
β-carotene, absorption and utilization in jaundiced and choledochocolostomized vitamin A deficient rats, ...13440
carotin, antagonistic action to thyroxin, ...11174
in cow's ovary, ...12428
effect on avitaminosis A, guinea pig, ...15747
on purin content of normal and sarcoma tissue, rat, ..13736
in fat of *Orthagoriscus mola*, ...13631
follicular hormone as related to, 7022
in guinea pig liver, content as affected by codliver oil in diet, ..15747
oxidation, antagonized by thyroxin, ...13590
oxidation products, relation to vitamin A, ...6963
preservation in hay, ...14437
xerophthalmia and, ...5063
carotinoid(s), absorption of light energy by 380
in bacteria, forms and properties, ...12033
chemistry, monograph, ...13870
compounds in certain fruits, nature, ...13746
in diet, as sources of feather pigments, ...13724
effect on autoxidation of unsaturated fatty acids, ...586
on yolk color of eggs, ...12161
in fat-soluble pigments of aerobic bacteria, ...3359
in fishes, detn. 11397
in hagfish, nature, ...2781
in human blood and milk, ...13739
relation to reproduction, plants, ...17934
and vision, ...17974
and xanthophyll, relation to chlorophyll, ...13366
of caterpillar testis and eye, gene control in *Ephestia*, ...13083
chemical nature and distribution in potato, ...4406
chlororaphin, oxychlororaphin from, ...9840
production by *Bacillus chlororaphis*, ...9841
chlorocruorin, crystalline, preparation and properties, from *Spirographis spallanzanii*, ...2636
Spirographis blood pigment, O to iron ratio, ...18198
in cod egg, ...13617
color groups in Myxomycetes, solubility experiments, changes, precipitation, etc., ...16723
conjunctive in vitamin A deficiency, histopathology, ...7291
crustacean, chemistry, ...9287
cytochrome, absence in anaerobes, 7573
absorption spectrum, factors affecting, ...11260
in animal tissues, iron and copper ingestion as affecting, ...11253
oxidases associated with, in *Bact. pasteurianum*, ...2540
reduction as influenced by dinitrophenol, and iodoacetic acid, yeast, ...9383
respiratory function and distribution in nature, ...13596
state of oxidation in cells as influenced by various agents, 15601
and supposed direct spectroscopic observation of oxidase, 18036
cytochrome c, oxidation-reduction equivalent, ...2587, 18218
erythin in snake, Brazil, ...6402
of eyes and hair, in relation to range of vision, ...18596
of eyelashes and -brows in man, heredity, ...16983
in feathers as affected by thyroid and testes extracts, seasonal variation and, mallard drakes, ...648
in fish, as influenced by intermedin, ...13988
flavine, in body tissues and fluids, detn., ...13753
crystalline, vitamin B_2 activity, 13752
free and bound, separation, method, ...13753
identity with vitamin B_2, ...6951
in malt, ...6962
-protein, effect on dehydrogenation of malic acid by liver enzyme, ...11183
reduction, mechanism, ...18078
relation to carotenes and vitamins A and B_2, ...6966
toxoflavin as related to, ...11262
vitamin B_2 in flavo proteins and, comparison, ...13755
flavone, from *Digitalis*, chemistry, 17893
flavonols, in tangerine peel, ...17894
flavoxanthin, from *Ranunculus acer*, chemistry, ...352
flower, genetico-physiology in *Pharbitis*, ...4376
formation, in algae, as influenced by light, ...9036
bacterial, as influenced by drugs and chemicals, ...7576
by glycerol, ...9843
by pH, ...9845
inhibition, substances causing and mechanism, ...7576
variations in, ...3361
in *Cercaria*, ...17118
in snail, ...17118
comparative rates, in etiolated plants exposed to light, ...13366
in fruit skins, as influenced by ultraviolet, ...9030
by short waved monochromatic ultraviolet light, ...17899
as influenced by visual stimuli, mice, ...9307
inheritance, canary, ...2288
in leaves, light as affecting, ...8993
in liver and spleen of amphibians, histology, ...16887
in mammals and seeds, origin, 13027
in oranges, as influenced by ethylene and CO_2, ...5641
in *Phoma baxi*, ...4739
in fowl plumage, ...5517
glycymerine, from *Petunculus glycymeris*, ...6954
in *Griffithsia*, as influenced by electric current, ...13334
green, production from hemoglobin by bacterial and non-bacterial reducing systems, mechanism, 9812
of *Haliotis*, chemical nature, ...2676
hematin, derivatives, peroxidase activity, ...11171
in horseradish peroxidase, chemistry and activity, ...2536
iron in, detn., ...18218
from muscle hemoglobin, properties, ...18298
peroxidase activity, ...6828
reaction with sodium in liquid ammonia, ...13612
hematoporphyrin, action in body and excretion, ...16047
enzymatic activity, ...11142
hemazoin, chemical studies, ...14213

hemin, compounds, dopa-oxydase as, ...17899
as enzymes, review, ...18059
in heart muscle, extraction method and properties, ...2661
hemin-like catalytic system in nerve, ...18633
hemocyanin, carbon monoxide combination with, ...561
composition, from different animals, ...2645
Cu and other metals in, analysis, ...2638
in hemoglobin formation, availability of Cu in, ...13708
review, ...2673
hemosiderin, deposits, ...5064
isolation method and nature of Fe compounds in, ...9162
as influenced by extirpation of pituitary and regeneration, in axolotl, ...3856
inheritance of white-spotting in negroes, ...2351
intestinal absorption, factors affecting, ...2816
of iris, migration in moth, ...15835
Juglon and Lawson, rôle in respiration, ...15577
kryptoxanthin, from berries of *Physalis* sp., vitamin A properties, 2775
lactoflavin, effect on arginase activity, ...2590
on xanthine oxidase reaction with molecular oxygen, ..18026
irradiation product (lumichrome), description, ...13757
oxidation-reduction potential, 13440
purification and properties, ...2776
as vitamin B_2, ...13755
in lamina cribosa as related to melanoma of optic disc, ...7295
in *Leonotis* flowers, ...17890
lipochromes, in crustacea, ...6954
relation to lyochromes and vitamins A and B_2, ...6966
lithochlorin, in animal concrements, ...11436
in liver oil of *Regalecus*, ...18373
lumichrome, formation from ovoflavine by irradiation, ...13758
an irradiation product of lactoflavine, description, ...13757
lycopene, in tomatoes, chemistry, 6681 6682
lyochromes, oxidation-reduction potentials, ...13600
relation to lipochromes and vitamins A and B_2, ...6966
malaria, ...14213, 14232
maltoflavin, oxidation-reduction potentials and, ...13600
melanin, formation in neoplasm of skin, ...7256
mobilization and excretion in pathologic conditions, ...16158
in plants, formation as influenced by ultra-violet, ...9030
in urine, dihydroxyindole as chromogen, ...16170
mesobiliverdin, physical and chemical properties, ...9194
of milk, ...14324
in oils of marine animals, ...13616
oocyan, physical and chemical properties, ...9194

Pigments (*continued*)
ovoflavine, as affected by irradiation, ...13758
....13755
as vitamin B_2, ...13755
ovoflavin-g, as isolated from eggs, 6961
oxidation-reduction, of tissue, distribution, ...2585
oxychlororaphin, dehydrogenated form of chlororaphin, ...9840
oxyflavone, in cereals, method of formation, ...17950
of pericarp of cereals, ...396
phthiocol, of human-type tubercle bacillus, composition and synthetic production, ...9813
constitution, ...1242
synthesis, ...5398
phylloerythrin, sensitizing agent in geeldikkop disease and icterus of sheep, ...14525
plant, review, ...13451
porphyrin(s), sensitization by, effect on Grenz ray and x-ray epilation, mice, ...423
prodigiosin, oxidation products, ..9882
review, ...5366
prophyrin, excretion, pathology, 11691
pyocyanin, effect on respiration in bacteria, ...9819
in non-nucleated erythrocytes, 9819
as respiration catalyst, and toxicity, ...13593
review, ...5366
respiratory. (See also various pigments, e.g., *cytochrome, flavins* above; and *Enzymes, respiratory.*)

histopathology of adrenal, heart and testis, ...849
as influenced by diet, guinea pig, ...15749
by vitamins A and D in diet, ...15748
sodium chloride retention in,..607
detection, by 2-6 dichlorphenolindophenol, ...6952
detn., chemical method, 11381, 13777
micro-chemical method, ...13773
of plant and animal tissue, titration method, ...11384
Vitamin (*continued*)
C (*continued*)
detn. (*continued*)
prune as used in,.....9125
removal of cysteine and ergothioneine in, ...4763
standardization of 2, 6-dichlorophenolindophenol used in, ...6964
diphtheria toxin antagonized by, ...13776
distribution, in plant and animal tissues, ...11384
effect on:
activity of glycolytic enzyme from muscle extract, ...18050
amylases, ...13402
anemia, ...924
arginase activity, ...2590, 11181
epinephrine oxidation, ...7084
fatty acid oxidation in liver slices, ...13784
lactic acid oxidation in vitro, 600
lipid formation in adrenals,...6527
metabolic rate, ...11415
rate of healing in fractured bones, ...11494
thyroid and adrenals, guinea pig, ...6972
tumor growth, ...11638
in eye lens, detection,.....6942
fixation, in tissues of body, as affected by vitamin C lack, guinea pig, ...13774
in growing peas and wheat,....11391
isolation, from paprika, method, ...13786
isolation and identification,....13789
isomerides and homologues, antiscorbutic activity, ...13775
in liver, as affected by freezing and storage, sheep, ...2784
by pituitary growth hormone, rat, ...18477
in milk, pasteurization as affecting, ...9796, 13745
in orange juice, as affected by CO_2 and sodium benzoate, ...2787
by exposure to air,.....6960
oxidase specific for,.....18072
oxidation, animal tissues as affecting, ...15603
reversible, by enzymes,.....15574
oxidation-reduction potential, ..2586
physical constants, ...13772
preparation from *Capsicum annuum,* 13770
preservation in hay,.....14437
refractive index, ...15718
requirements, dog, ...2771
review,.....13785, 18077
synthesis, ...13783
dog, ...2771
in plants, optimum conditions for, ...13721
and synthetic analogues, comparison of properties, ...13769
thyreotropic action as affected by KOH, H_2O_2 and air,....13892
in tissues, age as affecting, man, ...13790
in tissue extracts,.....2585
tissue renewal by,.....13782
in tomatoes, diploids and tetraploids compared, ...13781
in tumor tissue, causing discrepancy in glutathione values obtained colorimetrically and by I titration, ...13589
and effect of ingestion on tumor growth, ...11254
in urine, dietary intake as affecting, ...598
D. (See also *Rickets;* and various antirachitic agents, e.g., *Cod liver oil, Ergosterol, Ultraviolet.*)
absorption, as influenced by:
bile, ...15711
bile duct ablation, rat,....13801
mineral oil, ...13802
from skin, ...11378
in body fat, of sea mammals and fish, ...2782
of seal, ...2779
in butter, as affected by diet, complex nature, ...15725
in cacao bean,.....2767, 11394
calcium metabolism as related to, ...13706
Vitamin (*continued*)
D (*continued*)
calcium and phosphate of diet as modifying effect, ...11399
in canned shrimp,.....2785
capyvara oil as source,.....15733
in cod liver oil, source,.....13795
concentrate, quantitative requirement, ...11417
concentration, from liver oils, method, ...13800
curative dose as related to preventive dose, ...13809
deficiency, effect on sensitivity to gossypol, rat, ...596
index of calcification, detn., use of tail bones of rat in,..9169
as influenced by cereals in diet, comparison, ...6945
infra-red as affecting growth in, rats, ...11226
life curves and inheritance, rats, ...8729
detn., biological, simpler method of dosing in, ...13718
chemical methods, value, 606, 11381
line test, accuracy,.....13796
x-ray technic, ...11400
in dried yeast, irradiation by sunlight and, ...2759
effect on:
ash content of bone, chick,..11390
basal metabolism, ...2798
blood serum calcium, children, ...11387
bone calcification, in vitro,...9173
calcification of tooth dentine, rat, ...2751
Ca absorption in tuberculosis, ...15701
Ca and P content of blood, chick, ...11390
cholesterol content of blood, 15730
endochondral ossification in infants, correlation of x-ray and histologic pictures, ..14048
metabolic rate of rat,.....11395
metabolism of N, Ca, and P, rat, ...601
muscle Ca, ...11498
rate of healing in fractured bones, ...11494
tooth caries, children,.....13791
rats, ...16088
vitamin A detn. by xerophthalmia test, ...13730
in egg yolk as affected by diet, 13793
from ergosterol, by irradiation of Li sulphate, ...15731
fate in chicken,.....13440
formation, by irradiation of ergosterol through rat epidermis,..13805
in skin by light, pigmentation as affecting, ...13806
in yeast, by ultraviolet, factors affecting, ...6973
in green plants,.....15743
in halibut liver oil, correlation with seasonal variations in oil content of halibut liver,....13440
ingested, distribution in blood and organs, dog, ...13794
international unit, biological activity in rat, ...11405
and irradiated ergosterol, comparison of physical properties,....593
from irradiated ergosterol, preparation and properties,.....2804
in maize, ...15716
as affected by maturity, germination, and autolysis of kernel, ...612
in marine algae,.....2758
in milk, cholesterol content as related to, ...11379
as influenced by:
diet containing irradiated yeast as compared with irradiated ergosterol, ...13807
dietary source, ...15726
feeding cod-liver oil concentrate, ...6965
irradiation, ...6959, 13810 .....15752, 15753
comparison of methods,..2792
fat content in relation to, 6985 15751
method for controlling content, ...6982
methods of increasing,.....16437

Vitamin (*continued*)
D (*continued*)
milk enriched with, relative value of various types, ...13792
tests of potency, infant, ...15705
mode of action in thyroparathyroid diseases, ...16151
from oils of phyto- and zooplankton, ...13177
overdosage, effect on:
kidney, histopathology, ...3078
liver, rats, ...2795
metabolism, rat, ...15740
mineral metabolism, rat, ...2780
weight and appetite, ...2798
relation to union of fractures, 2786
toxicity, parathyroidectomy as affecting, dog, ...6947
rat, ...15717
and phosphorus, in treatment of rickets, interaction, ...6944
photochemical formation, ...2764
potency, in plant and animal oils, ...15725
preparations, assayed, ...15715
calciferol, as affected by irradiation with monochromatic light, ...11386
effect on Ca content of feces, ...13936
purification and physical properties, ...592
relation to growth and resistance to disease, vitamin A and, 15754
requirement, chick, ...15728
review, ...18077
Shear's test, terpenes and furan derivatives as positive for, 603
storage and excretion, chick, ...602
therapy in rickets, mechanism of action, ...6970
third fraction, ...13808
tunny liver as source, ...13743
utilization, as influenced by source, infants, ...13803
from various sources, comparative efficiency in chicken, ...6940
water soluble derivative, therapeutic value, ...779
in zooplankton, detn., ...13795
E. (See also *Fertility; Reproduction; Sterility.*)
absorption spectrum, at low temp., ...11386
anterior pituitary hormone and prolan A as substitute for, rat, 13856
chemical properties, ...13440
deficiency, effect on:
adrenal glands of albino rat, 3816
reproduction and lactation in rats, ...2755
testis, in fowl, ...13811
producing sterility in rats, ..11407
deficient diet, formula, ...15744
effect on cell division, ...11377
on sexual development, rat, ..13856
follicular hormone as related to, 7022
fractions, sex specificity, ...13812
in soy bean oil, ...13813, 15755
in sperm head of fowl, ...15276
stability toward oxidizing and reducing reagents, ...15732
in testes and seminal fluid, ...7085
wheat-germ oil fraction containing, absorption spectrum, ...2757
G. (See also *Black tongue; Pellagra;* and *flavines* under *Pigments.*)
as antianemic factor, ...13761
in canned foods, ...15714
in canned green onions and lettuce and in lean pork and peanut meal, ...11416
carotins as related to, ...6966
concentrate, preparation, method, ...13760
concentration and chemical nature, ...13440, 13747
concentration and fractionation, 6974
deficiency, causing anorexia, ...15741
causing cataract in albino rats, ...7315
causing dermatitis in chicks, 16199
effect on:
blood serum amylase activity, rat, ...537
digestion in rat, ...11142
rats of different ages, ...15702
studies, dogs, ...17974

Vitamin (*continued*)
G (*continued*)
detn., diet for, ...13754
fluoroscope for use in, ...11270
Munsell method, ...13749
effect on:
body weight, ...11385
growth rate and longevity, necessary vs. optimal intake, ...11411
hematopoiesis, ...15750
lactation and growth in rat, ..15709
in feces, as affected by type of carbohydrate in diet, rat, ...6957
in fish meals, ...12171
in flavine, detn., ...13752
in flavine and flavoproteins, comparison, ...13755
flavine identical with, ...6951
flavines as related to, ...6966
in hay, ...6980
in Indian mango, ...6958
in liver, ...11385
in liver extract and brewer's yeast, comparison, ...13761
in liver extracts and gastric mucosa, ...15698
in milk, as affected by pasteurization method, ...13750
by yeast in diet, human, ..15704
concentration and fractionation, ...11401
in pears, ...13749
preparation and properties, ...15695
as related to adrenal cortex hormone, ...17974
requirement, for growth, as affected by weight of rats, ...15696
variations with diet, ..15713, 18375
in rye, ...11339
sake as source, ...13756
sources, ...11409
sparing action of fats, ...15707
stability, ...13440
in treatment of vitamin B deficiency, clinical study, ...13751

as influenced by:
asparagine and pH,.....17887
deuterium, ...4737, 8997
2-4 dinitrophenol, ...9019
ultraviolet and thymus nucleic acid, ...9034
minimum temps. for,.....16457
rate, factors affecting,.....12000
in mixed populations,.....129
stimulants for, in white sugars,..363
studies, ...13452
technics for measuring,.....11283
growth and respiration, as influenced by ultra-violet, ...9041
as influenced by:
H_2S treatment, ...1205
mitogenetic rays, kinetics,.....9045
oxidation-reduction potential of medium, ...7562
ultra-violet, temp. and quanta relations, ...17902, 17903
x-rays and metals,.....9040
x-rays and ultra-violet,.....9039
intracellular rH in,.....2524
invertase, as influenced by monochromatic light, ...9038
preparation, ...13397
irradiated, milk vitamin D from,..15726
value in production of vitamin D milk as compared with value of irradiated ergosterol, ...13807
as vitamin D source, in chicken, 6940
of Italian cheese,.....19240
lactic acid oxidation by, rôle of oxygen carrier in, ...18028
lipids, chemistry, ...17959
maltase, of bakers', factors affecting, ...16425
as influenced by monochromatic light, ...13399
metabolism, rôle of phosphates in, 4711
milk sugar, β-glucosidase,.....391
necrobiotic ultra-violet emitted by, 9033
N metabolism, ...17881
nucleic acid. (See under *Nucleic acid.*)

Yeast (*continued*)
oryzanin, ultraviolet irradiation, effect on vitamin B_1 activity,....15719
osteitis due to,.....14284
oxido-reduction by, as influenced by Na-taurocholate,.....4706
pathogenic, fungicidal action of phenol derivatives on, as influenced by alkyl groups and halogens, 7520
phosphatase from, action on phosphate substrata,.....2537
physiological activities as influenced by iodine,.....9542
phytokinase and proteinase separated from,.....2569
pitch, brewing contaminations introduced with, biological control,.....3321
population, growth cycle,.....8996
proteins,.....13440
respiration, as influenced by:
cyanide,.....9016
deuterium oxide,.....9025, 9072
dinitrophenols,.....2530, 9015
.....9016, 17885, 18720
of Russian leavens,.....3326
serodiagnosis, precipitin absorption by equivalent antigen-antibody ratio in,.....978
staining, potassium permanganate method,.....16468
symbiosis in insects,.....5100
therapy in pellagra and pernicious anemia,.....11684
throat infections by organisms resembling, characteristics and pathogenesis,.....1156
top vs. bottom, co-zymase,.....1205
variability and control in flour gassing tests,.....16425
variations due to KCl,.....12282
vitamin B complex, multiple nature,.....11142
vitamin B concentrate from, effect on leprosy,.....9705
vitamin B isolated from, composition,.....13763
vitamin B value of preparations,..2791
vitamin B_1 preparation from, method,.....609, 13759
vitamin B_1 and B_2 concentrates from, preparation method,.....13760
vitamin D formation in, by ultraviolet light, factors affecting,....6973
vitamin G in,.....11385
heat as affecting,.....594
Yellow fever. (See *Aedes; Mosquitoes.*)

BIOLOGICAL ABSTRACTS

A COMPREHENSIVE ABSTRACTING AND INDEXING JOURNAL
OF THE WORLD'S LITERATURE IN THEORETICAL
AND APPLIED BIOLOGY, EXCLUSIVE
OF CLINICAL MEDICINE

Volume 9

1935

Published (beginning with the literature of 1926) under the Auspices of the
UNION OF AMERICAN BIOLOGICAL SOCIETIES
With the Cooperation of Biologists Generally

Editorial and Executive Offices: University of Pennsylvania
Philadelphia, Pennsylvania, U. S. A.

BIOLOGICAL ABSTRACTS

VOL. 9, NO. 10 DECEMBER, 1935

Publication Office: 1500 Greenmount Ave., Baltimore, Md.
Executive and Editorial Office: University of Pennsylvania, Philadelphia, Pa., U. S. A.

STAFF OF THE CENTRAL EDITORIAL OFFICE

Scientific

Mary Jones Fisher, *Assoc. Ed.* — Jean MacCreight — Frederick V. Rand — Thelma Stevens

Editorial Notice

Biological Abstracts is a cooperative undertaking in which biologists throughout the world are invited to participate. In accordance with this policy it is hoped that in the largest degree practicable the abstracting may be done by collaborators resident in the various parts of the world whence the literature emanates.

Interested biologists are invited to communicate with the editors at the above address.

Publication and Subscription Notice

Publication Schedule

Biological Abstracts is issued monthly, October to May, and bi-monthly, June to September. The volume coincides with the calendar year.

Subscription Rates

The subscription price of Biological Abstracts is $15.00 per annual volume.

Special Announcement to Individual Biologists.—The Journal is a cooperative undertaking, the abstracts being contributed by biological workers throughout the scientific world. In order to provide the service at as low a price as possible, this world-wide cooperation is invited, and generously given in one way or another by thousands of individual biologists, on a non-honorarium basis. This liberal cooperation is in no small degree responsible for the reasonable price at which the comprehensive abstracting and indexing service is offered.

In view of this contribution by biologists generally, a reduction of 40% is made to scientists provided the Journal is to become their private property and is paid for from their personal accounts; in other words, the subscription price is $9.00 to individual scientists under the above conditions.

Make checks payable to BIOLOGICAL ABSTRACTS.

DIFCO

INGREDIENTS
FOR BACTERIOLOGICAL CULTURE MEDIA

This group of ingredients is prepared expressly for use in bacteriological culture media. Each product is required to meet the highest standards of suitability for the purpose for which it is employed. The high degree of uniformity of each product guarantees the preparation of comparable culture media upon which reliable and accurate results will be secured.

BACTO-PEPTONE

Bacto-Peptone is the standard peptone for use in the preparation of routine media for general purposes. It is rich in readily available forms of nitrogen and is sparklingly clear in a one per cent. solution with a reaction of pH 7.0.

PROTEOSE-PEPTONE, DIFCO

Proteose-Peptone is an excellent peptone for the propagation of the more fastidious bacteria. In media containing this peptone the longevity of cultures is increased and their virulence is maintained for long periods of time.

NEOPEPTONE, DIFCO

Neopeptone is free from the toxic factors which inhibit or prevent the development of the more delicate bacteria. It is, therefore, excellently suited for the cultivation of the organisms which usually grow only with difficulty on artificial culture media. Growth from relatively minute inocula readily takes place in media prepared with this peptone.

BACTO-TRYPTONE

Bacto-Tryptone is most useful for the detection of indol production by bacteria. Exceptionally strong and reliably accurate tests for indol are secured when a one per cent. solution of this peptone is employed as the medium.

BACTO-BEEF EXTRACT

Bacto-Beef Extract is completely soluble in the concentrations required for culture media and has a reaction of pH 6.6. It is an excellent nutriment for bacteria.

BACTO-YEAST EXTRACT

Bacto-Yeast Extract is used as a stimulator of bacterial growth for the propagation of the more fastidious organisms. It is rich in readily available nitrogen.
